Subject encrypted: Email to test CCCHD's new encryption capabilities

Attachments [image001.png \(10KB\)](#)

Dear Christina,

This email is to test the encryption capabilities now available to CCCHD employees who want to use email to transmit protected health information.

This test message is about patient Jane Doe who is being requested to follow up with an infection control doctor due to lab results which were unable to be verified.

Thank you.

Christina Conover. BSN. RN
