*Unless otherwise specified, all cases are totaled by event date.*

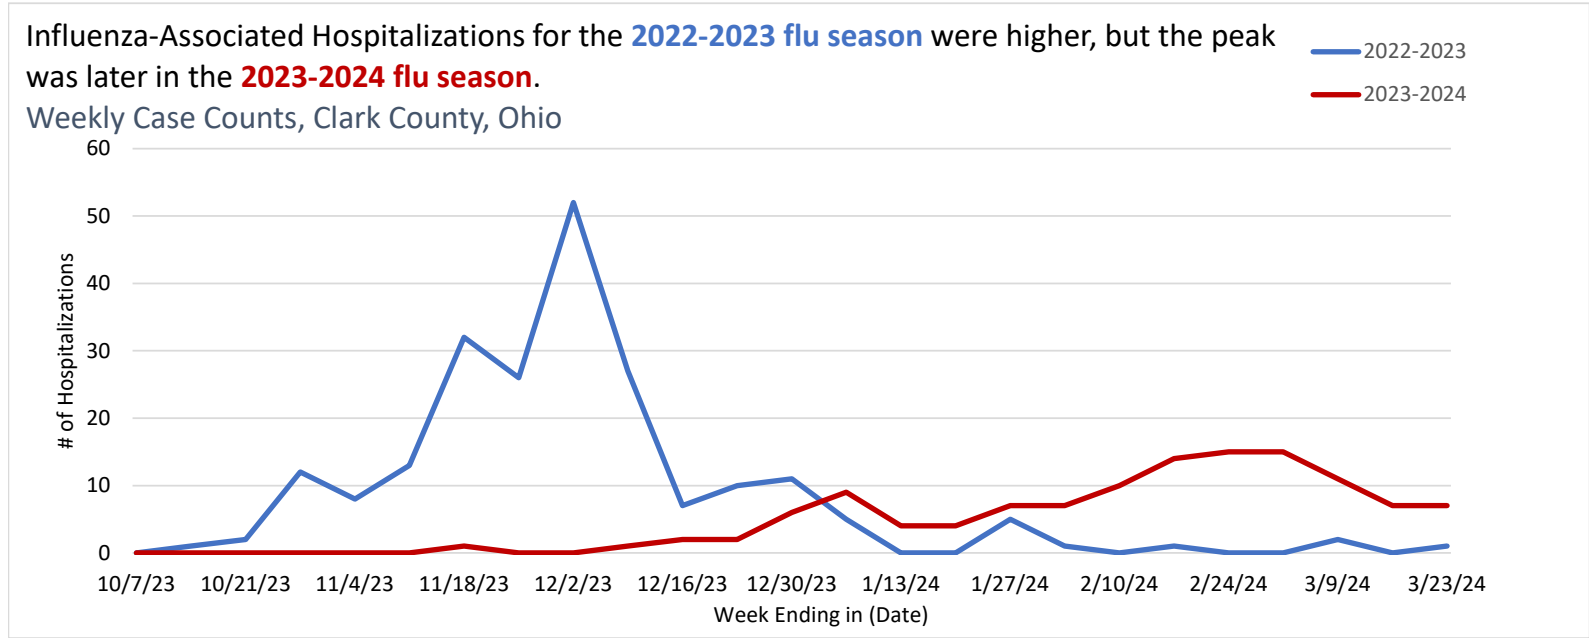

*HIV cases are reviewed by ODH and case dispositions are subject to change in this report. Final HIV data is reported in the ODH HIV Surveillance report.*

*#HIV data were collected from ODRS and not from ODH HIV Surveillance. Total numbers are all cases investigated which includes some previously diagnosed.*

*†Cases were totaled based on date reported to ODH.*

**Notes for BOH:**

1. The number of influenza associated hospitalizations is higher than the same time last year. There were actually a higher number of total influenza associated hospitalizations last flu season, but the peak was much later this year (see graph below).
2. One new active TB case this quarter that is in isolation.
3. There has been an increase in Pertussis cases. There is not an outbreak in Clark County, but there is a large outbreak in Montgomery County of Pertussis.

**UPDATE LOG**

09/13/2024: Revised HIV footnote on page 1 to explain total cases. Added HIV footnote to explain cases are reviewed by ODH. Corrected header.
