Unless otherwise specified, all cases are totaled by event date and were living in Clark County at diagnosis. Event Date is the earliest date among diagnosis date, illness onset date, date reported, and specimen collection date, except for congenital syphilis and COVID-19. If classified as congenital syphilis, the event date is determined based on the reporting dates to either the local health department or the Ohio Department of Health, whichever is earliest. If classified as COVID-19, the event date is calculated based on specimen collection date, specimen received date, and specimen test result date, whichever is earliest.

†Cases were totaled based on date reported to ODH.

‡HIV data were collected from ODRS and not from ODH HIV Surveillance.

**No Confirmed or Probable cases in 2021

- Represents that the 5 year trend is increasing

- Represents that the 5 year trend is decreasing

- Represents that the 5 year trend is staying the same or cannot be calculated due to insufficient data
