Unless otherwise specified, all cases are totaled by event date and were living in Clark County at diagnosis. Event Date is the earliest date among diagnosis date, illness onset date, date reported, and specimen collection date, except for congenital syphilis and COVID-19. If classified as congenital syphilis, the event date is determined based on the reporting dates to either the local health department or the Ohio Department of Health, whichever is earliest. If classified as COVID-19, the event date is calculated based on specimen collection date, specimen received date, and specimen test result date, whichever is earliest.
 †Cases were totaled based on date reported to ODH.

- Represents that the 5 year trend is increasing

- Represents that the 5 year trend is decreasing

- Represents that the 5 year trend is staying the same or cannot be calculated due to insufficient data

Clark County HIV Data Summary

People with a New Diagnosis of HIV while living in Clark County, 2022

Clark County HIV Data Summary	2022 Annual CD Report				
	Quarter 1	Quarter 2	Quarter 3	Quarter 4	Total
HIV	1	3	5	3	12

Notes about HIV Data: The above data were collected from the Ohio Disease Reporting System (ODRS). HIV cases are reviewed by ODH and case dispositions are subject to change in this report. Final HIV data are gathered from the enhanced HIV/AIDS Reporting System (eHars) and reported in the ODH HIV Surveillance Report. Cases reported above were residents of Clark County at the time of diagnosis and dispositioned as either a) Previous Negative, New Positive, or b) Not Previously Tested, New Positive for patients recently diagnosed with HIV.

Change Log:

11/15/24: Updated Clark County HIV data to reflect criteria defined by the Ohio Department of Health.
