Total	913	118	1031	1031	983	219	1202	1202

All cases are totaled by event date and were living in Clark County at diagnosis. Event Date is the earliest date among diagnosis date, illness onset date, date reported, and specimen collection date, except for congenital syphilis and COVID-19. If classified as congenital syphilis, the event date is determined based on the reporting dates to either the local health department or the Ohio Department of Health, whichever is earliest. If classified as COVID-19, the event date is calculated based on specimen collection date, specimen received date, and specimen test result date, whichever is earliest.

Clark County HIV Data Summary

People with a New Diagnosis of HIV while living in Clark County, 2025 Q1

HIV (New Diagnoses)	Q1 2025		Q1 2024	
	Total	YTD	Total	YTD
	7	7	12	12

Notes about the HIV Data: The above data were collected from the Ohio Disease Reporting System (ODRS). HIV cases are reviewed by ODH, and case dispositions are subject to change in this report. All HIV data for 2025 is preliminary and should not be used for comparison to previous years, program planning, or trend analysis. Final HIV data are gathered from the enhanced HIV/AIDS Reporting System (eHARS) and reported in the ODH HIV Surveillance Report. Cases reported above were residents of Clark County at the time of diagnosis and dispositioned as either a) Previous Negative, New Positive, or b) Not Previously Tested, New Positive for patients recently diagnosed with HIV.
